FULL STACK WEB DEVELOPER

PROFESSIONAL SUMMARY

Motivated and detail-oriented Full Stack Web Developer with hands-on experience building responsive, user-focused web applications using React.js, JavaScript, Node.js, Express.js, Python/Django, MongoDB, and Supabase. Currently working as a MERN Stack Developer Intern at ArhamSoft, gaining professional experience in full-stack development. Skilled in developing RESTful APIs, authentication systems, CRUD applications, role-based access control, real-time applications, and database-driven systems.

TECHNICAL SKILLS

- **Frontend Development:** HTML5, CSS3, Bootstrap 5, React.js, JavaScript
- **Backend Development:** Node.js, Express.js, Python, Django, RESTful APIs
- **Databases:** MongoDB, Mongoose, PostgreSQL, Supabase, MS SQL Server, SQLite
- **Authentication & Security:** JWT, bcrypt, Cookie-Based Authentication, Supabase Auth, Role-Based Access Control (RBAC), Row Level Security (RLS)
- **Real-Time Technologies:** Socket.IO, Supabase Realtime, WebRTC
- **Programming Languages:** C, C++, C#, JavaScript, Python
- **Tools & Platforms:** Git, GitHub, VS Code, Postman

PROFESSIONAL EXPERIENCE

MERN Stack Developer Intern

ArhamSoft | Onsite **July 2026 – Present**

- Develop and enhance web application features using React.js, JavaScript, Node.js, Express.js, and MongoDB.
- Build and maintain reusable frontend components and full-stack application functionality.
- Work with RESTful APIs, database operations, authentication systems, and application features.
- Implement and improve responsive user interfaces to enhance usability and user experience.
- Collaborate within a professional development environment and follow structured software development practices.

PROJECTS

1. Facebook Clone — Full Stack Social Media Application

Technologies: React.js, Supabase, PostgreSQL, Supabase Auth, Supabase Realtime, Supabase Storage, RLS, Bootstrap 5

- Developed a full-stack social media platform featuring user authentication, profiles, posts, comments, friendships, messaging, and notifications.
- Implemented post management features, including privacy settings, likes, saves, shares, comments, replies, and mentions.
- Developed friend requests, user blocking, and other social interaction functionalities.
- Integrated Supabase Realtime for instant messaging and real-time notifications.
- Implemented user reporting and administrative moderation features, including account suspension and restoration.
- Utilized PostgreSQL, Supabase Storage, Row Level Security (RLS), and protected routes to secure application data and control access.

2. Real-Time Chat Application — MERN Stack & WebRTC

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.IO, WebRTC, JWT

- Developed a full-stack real-time messaging application using the MERN stack.
- Implemented real-time one-to-one messaging using Socket.IO.
- Integrated message read receipts and real-time message status updates.
- Implemented peer-to-peer audio calls using WebRTC.

- Developed call initiation, incoming call handling, call acceptance, and call termination functionalities.
- Integrated JWT-based authentication and protected routes to secure application access.
- Developed backend APIs and integrated MongoDB for storing and managing user and message data.

3. Task Management System — MERN Stack

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, bcrypt, Multer

- Developed a full-stack task and to-do management application with complete CRUD functionality.
- Implemented JWT-based cookie authentication and bcrypt password hashing for secure user authentication.
- Designed user-specific task and to-do management features to ensure data access control.
- Developed administrative functionality with user management, role-based access control, and module-level permissions.
- Integrated Multer for profile image uploads.
- Built an interactive dashboard displaying task and to-do statistics, including completed and pending items.

4. ResumEase — AI-Powered HR Assistant

Technologies: Python, Django, HTML5, CSS3, Bootstrap 5, JavaScript, SQLite, AI/ML

- Developed an AI-powered recruitment platform to assist with resume screening and interview scheduling.
- Implemented resume uploading and candidate information extraction functionalities.
- Developed skill-matching features to identify suitable candidates based on job requirements.
- Implemented candidate shortlisting based on education, skills, and professional experience.
- Designed responsive dashboards for recruiters and other system users.
- Built a database-driven application using Django and SQLite to manage recruitment-related information.

EDUCATION

Bachelor of Information Engineering Technology

Superior University, Lahore, Pakistan 2021 – 2025

CGPA: 3.48/4.00

CERTIFICATIONS

- **JavaScript Full Stack / Web Development** — NAVTTC
- **AI Fundamentals: Foundations for Understanding AI** — Cisco / IBM SkillsBuild, 2026

ADDITIONAL CERTIFICATION

Advanced Certification in JavaScript & Full Stack Development (MEAN-MERN)

Centre for Digital Literacy & Business Management September 2025 – November 2025

- **Grade:** A+
